

This volume debates the complex nature of the relationships between globalization, social and economic transformations and growing inequalities. Employing a global, world-historical and comparative perspective, the 15 articles brought together in this volume deal with three central questions: Firstly, the question of the spatiotemporal evolution and variations in growing inequalities, secondly, the relative importance of globalization as compared to other factors that explain growing inequalities and, thirdly, institutional variations affecting inequality dynamics and globalization impacts.

Christian Suter is Professor of Economic Sociology at the University of Neuchâtel and President of the World Society Foundation, domiciled at the University of Zurich, Switzerland.
